

PRESS RELEASE

Collectis plant sciences launches its new website

New Brighton (Minnesota, USA), September 29, 2014 – Collectis plant sciences, the plant genome engineering company, is proud to announce today the launch of its new website www.collectis-plantsciences.com.

Based in Minnesota, Collectis plant sciences develops healthier products in four major crops: potato, soybean, wheat and canola. This new website is designed to offer quick and easy access to essential information and features for a more comprehensive understanding of the Company's core business. Collectis plant sciences' website reflects the Company's commitment to develop products with health benefit to consumers.

Luc Mathis, Chief Executive Officer of Collectis plant sciences commented, *"We are very proud of our new website that clearly conveys the focus of our Company. Our vision of agriculture is that future food products should have a benefit to consumers. Providing healthier characteristics in superior germplasm using our targeted breeding approach strategically positions Collectis plant sciences as a new leader in the agriculture and food industry. Our goal is to apply our platform broadly to other crops, including corn, coffee, cotton, rice, alfalfa, vegetables, fruits and other key crops to bring a revolution to the industry. Partnerships will help accelerate the development outside our core crops."*

About Collectis plant sciences, the world leader in plant gene editing

Founded in 2010, Collectis plant sciences is based in New Brighton, Minnesota (United States). The company has developed a platform to improve the agronomic value and quality of crops for the food and agriculture industries. Collectis plant sciences is involved in a network of collaborations that include global seed companies (Bayer, Limagrain, Monsanto, SESVanderhave among others), as well as leading healthcare (Mitsubishi Tanabe) and food companies. Collectis plant sciences is developing innovative products with prominent partners in order to secure access to the market.
